**Why choose our Language Immersion Summer Camp?**

*Simply put, we teach your child how to learn, retain and apply his or her language skills in real life.*

- Our school is the only one in the region fully endorsed by the French government.
- Our teachers are all fluent, native French and/or Spanish speakers.
- Children learn in a dynamic environment with hands-on and personalized instruction.
- Summer camp is an excellent foundation for our academic-year program.

**What makes learning a language at AIS different than other language study?**

*Since 2001, our approach gives students everyday opportunities to practice French and Spanish.*

Our thematic summer program builds a child's confidence and excitement about language learning. We bring local French and Hispanic culture to life through games, songs, arts, crafts, and theater!

**Why do your child's Spanish and French language skills increase at such a rapid rate?**

*Can't relocate to Europe? Sending your child to AIS is the next best thing!*

Studies show that earlier is better for second language acquisition. At our school, foreign languages are not just one subject in a routine day of learning – they are integrated directly into the curriculum.

**Dans tous les sens  
Come to your senses!  
¡En todos los sentidos!**
