

Community Update - Week of May 23

Dear AIS Community,

I am pleased to share the outstanding results from last week's visit by the AEFÉ French Ministry of Education Inspector, who concluded his two-day evaluation of our school.

Before departing for Ottawa, the inspector shared his concluding remarks:

"You have an amazing school full of dedicated faculty and staff, an extremely motivated and inspirational leadership team, and happy and thriving students. It has been a great visit. Good luck with your continued growth and development. I am looking forward to seeing the school evolve over the next few years."

The inspector was particularly impressed with our Cassady campus, noting that he was thoroughly impressed with the facilities and confirming it was exactly the right move for our school's growth. He praised how perfectly the facilities align with our educational needs and noted that this expansion positions us ideally for continued excellence in French education.

He also verified that we are successfully meeting AEFÉ standards for French curriculum delivery, and our enhanced security and expanded classrooms at the Cassady campus received specific praise.

The inspector will submit his official report to Paris, and I will share a copy with our community once received.

This successful inspection reflects the collective efforts of our entire school community. We have much to be proud of at AIS.

Thank you all for your continued commitment to excellence.

Best regards,

Ms. Ariane Baer-Harper
Head of School
Austin International School
